BELEVEILLE.

MEER MENTION

Ten police made no arrests last night. Baccini's brigade of fifty posters are in the city.

Private Kimmery won a \$50 prize in the O. R. A. matches at Toronto on Tuesday.

The Syracuse cricketers defeated the Pictou club yesterday by an innings and 13 runs.

Leaves of some trees in the country are turning a deep crimson, as though touched by a heavy frost.

A very odd rain cloud passed over this city this forenoon. The fall here was, fortunately, very light.

Heating stoves which have been on the retired list since May are being brushed up and prepared for use.

A match game of lacrosse will be played on the old cricket ground on Friday afternoon, between the Cobourg team and the Oka of Belleville.

Ten police officers are looking up unregistered dogs and prepare the magistrate a busy time in the near future. Prompt action on the part of owners may save cost.

Messrs. Bell, Merritt & Co., contractors for the Morrisburg works, are about closing their work at Oka Point quarry, but will resume work again in the fall. Since March last they have paid out over \$200,000 for labor.

A new plank walk is being put down on the west side of Front Street, from a front of Wm. Smith's store to Hotel St. John. This piece of work is highly appreciated, as it will be remembered the walk was always under water during the rainy season.

TEMPERATURE.

As registered by Dr. Bell's Self-Registering Thermometer.

Wednesday, Aug. 26, 9 a. m.
Maximum 64; minimum 48.
Barometer 29.90.

PROBABILITIES.

Tonorrow, Aug. 26.—Lakes, winds mostly north west and north, fine weather, stationary or slightly higher temperature.

Worthy of the Honor.

The London correspondent to the Montreal Herald mentions as a rumor that John Bell, Esq., Q. C., of Belleville is likely to succeed Mr. J. H. Hickson as General Manager of the Grand Trunk R. Y. Mr. Bell is at present the well-known Solicitor of the Company.

Who is it?

Mr. Tom. O. Carter, of the Kingston Whig, and Ald. Carson are in the city enjoying a holiday season. As they were soon shadowing the office of marriage license issuer Roblin, waiting his arrival this morning, it looked as though some of the fair ones of the City of the Bay was about to take flight to the Lime Stone City.

Hunger for 17 Days.

About five weeks since Mr. A. C. Barker, residing between L'Amable and Baccini, lost an ox. It was searched for in every direction, and at length found in an empty barn on a non-existent lot. Some one had carefully closed and fastened the door without looking inside, and the poor animal was there confined for a period of about seventeen days; at one end of the thresh floor there was a small bedding of straw, and when a horse had been established the previous year this was all it had to eat, and of course it was totally unprovided with water. When found the ox was a complete skeleton and could scarcely stand. It was at first spiritingly supplied with water, and with diligent nursing slowly recovered and now appears to be very little the worse for his long imprisonment.

Big Fishing.

Fishing at the Sand Banks is reported as being good. On Monday last three fishermen captured 60 pike in West Lake, some of them of immense size. Yesterday Messrs. A. N. Reid and John Taylor in their dory secured a muskallunge weighing 24 lb. and a pike 12 lb.

At the Driving Park.

A good half day of solid enjoyment was had at the Driving Park yesterday afternoon, when three races between horses of fair make up the programme.

The first half mile running race, best two in three, between "Mr. Harrington," "Nell" and John Smith's "Blackhawk Bay," for a purse of \$20, was won by "Nell" in two straight heats. Time, 1 min. 47 sec.

The half mile trotting race between W. H. Gray's "Butcher Boy" and R. H. Hays' "Kit" was won by "Kit" in the first and third heats. Time, 1:40; purse, \$5.

The third race was a half mile run between John Hays' "Gray Eagle" and Isaac Watson's veteran runner "Gipsy Queen." It proved a very exciting race, but was won by the Gipsy by half a length in 1 min.

A large crowd turned out to witness the sport and were highly gratified with the character of the races. Considerable money changed hands.

PERSONAL.

Mr. H. B. Warrington, of Birmingham, England, is in the city. Mr. Warrington is connected with the well known firm of Messrs. Gordon.

Mr. Jas. Gordon, Mr. Gordon, and infant daughter, have returned home in fine health after a year's sojourn in the fatherland, Scotland.

Mr. and Mrs. Mathison and Mr. and Mrs. Woodruff, left yesterday for the Sand Banks, returning by the Victoria to-day.

Mr. Wm. H. Pretty, who has been in Chicago for the past five years, is in the city visiting his parents.

The Rev. D. McNeill is visiting in Toronto.

The French Steamer Drains.

Street Surveyor Taylor says the cost of the French street drain has been over estimated by some of the Aldermen. The drain is half completed, and has cost but \$200, and when finished the total cost will not exceed \$400. While it may seem a considerable amount of money to expend on a street in a by-way of the city, it must be remembered that the improvement is permanent and that a further expenditure in that section will not be necessary, except for occasional slight repairs.

POLICE COURT.

The case of Mrs. H. M. P. Polo, for abusive language, was dismissed without a fine. The case of Mrs. H. M. P. Polo, for abusive language, was dismissed without a fine.

Wm. Hinds, for assaulting and using abusive language toward Gilbert Vanecko, was fined \$1 and costs in each case, amounting in all to \$13.41.

Cornelius Donovan charged J. McDonald with using abusive language, and a hearing was held which he was fined \$1 and costs for each offence, or \$7.80 in all. Thos. McDonald, W. S. Tenny and Wm. Hinds, were each fined \$1 and costs for neglecting to register their dogs. Several others were let off with a warning, and a small charge, but were dismissed with costs, having registered their dogs after the summons had been served. The war has only commenced.

The Garden Party.

The garden party on the grounds of Miss Murray last evening, in aid of the hospital fund, was a grand success, notwithstanding the coolness of the temperature. A large number of guests were present, and the evening was a most enjoyable one.

The Oldfield land were in attendance, and enjoyed the evening with musical selections, at frequent intervals.

Perilous Manoeuvres.

The Christ Church Sunday School picnic to Massena Point to-day, per steamer Puritan, was attended, regardless of the weather. The first boat left shortly after 10 o'clock, and was crowded with juveniles and a sufficient sprinkling of adult heads to keep them within bounds. Although a light fall of rain occurred soon after, there was a fair crowd on the boat waiting for the second boat when she arrived. They had a pleasant time at the Point.

OBITUARY.

On Sabbath, the 23rd inst., there was conveyed to her last resting place, in Shanonnville, all that was mortal of Mrs. Rhoda Bell, nee Davidson, of the City of the Bay, the 32nd of Thurloe. She was a loving wife, a kind and christian mother, a true friend to all with whom she came in contact. She had spent the whole of her long life, 65 years, within two miles of where she was born. She was the mother of three sons and one daughter. The neighbors and friends showed their respect for her by the large number (over 100) of carriages that followed the funeral cortege. The Presbyterian church, Shanonnville, was crowded, many having to sit on the door steps of the church to an appropriate and impressive service, presided by the Rev. Mr. Henderson, who had attended her in her last illness. He said in his closing remarks that "thus had passed away a christian and loving mother, who had treated her children as Jesus."

A Startling Discovery.

Mr. Wm. Johnson, of Huron, Ont., writes that his wife had been troubled with acute rheumatism for many years, and that all remedies had failed. He had been advised to try a bottle of Dr. King's New Discovery for Rheumatism, and he had done so. The result was a complete cure, and he was able to resume his usual work.

Dr. King's New Discovery.

Dr. King's New Discovery for Rheumatism is a most valuable remedy. It is a simple, safe, and effective cure for all cases of rheumatism, whether acute or chronic. It is sold in bottles of 50 cents and \$1.00.

The Value of a Good Name.

When a stranger asks to be introduced to a friend, the friend says, "He is a good man, and his name is well known." This is a good name, and it is a good name that is well known.

Anticipating these inquiries, the Montreal Resource Fund Life Association represents that it is a good name, and it is a good name that is well known.

That it has one hundred thousand dollars on deposit with the Insurance Department of this State as security for the performance of its engagements, and that it has a surplus of \$200,000 deposited with the Canadian Insurance Department for the security of policy holders in Canada.

That it is a good name in the City and State of New York, where its home office is located, and where its directors and officers reside.

That its good name, which is its best known asset, is well known to the public, and that it is a good name that is well known.

That the amount so issued was greater by one half than was issued by the Equitable, double that issued by the Mutual Life Insurance Company, and greater by a million and a quarter dollars than was issued by all the other (10) level premium companies of the State combined.

That at the end of the four years of business, it had in force a larger amount of insurance than the oldest, largest, and wealthiest of the old line companies had secured when it was twenty-three years old.

That it pays all its death claims in full, without delay or deduction, and at least half the cost of the usual level premiums required by the old line companies.

That it is content to rest its claims to confidence and patronage abroad, upon its reputation where it is best known and best patronized.

Murder at Verdun.

A gang of Garden Thieves Attack a Couple of Young Farmers and Family, Wound Several.

(Montreal Star, Aug. 25.) This season the farmers and market gardeners of the West End suburbs have had more trouble than usual with garden thieves.

At St. Henri, Cote St. Antoine, St. Gabriel and Verdun, crowds of ruffians from the city have been making things lively for the market gardeners and farmers, and, with every precaution, the latter have been unable to prevent the thieves from carrying on their depredations. The people of Verdun, in particular, are suffering from the depredations of the thieves.

The depredations of the thieves have been so frequent that the people of Verdun are suffering from the depredations of the thieves. The depredations of the thieves have been so frequent that the people of Verdun are suffering from the depredations of the thieves.

REBELVILLE, FRIDAY, AUG. 28.

CANADA ABROAD.

At a meeting of the Dairyman's Board of

Twelve, held at Union on the 24th inst.,

the following interesting discussion took place:

Mr. Blending asked how our dairy produce

from Canada, compared with that of the

United States, and it was found that Canada

produces more milk than the United States

per acre, but that the United States produces

more butter than Canada. Mr. Blending

then asked how our butter compared with

that of the United States, and it was found

that Canada produces more butter than the

United States per acre, but that the United

States produces more butter than Canada.

Mr. Blending then asked how our cheese

compared with that of the United States,

and it was found that Canada produces

more cheese than the United States per

acre, but that the United States produces

more cheese than Canada. Mr. Blending

then asked how our milk compared with

that of the United States, and it was found

that Canada produces more milk than the

United States per acre, but that the United

States produces more milk than Canada.

Mr. Blending then asked how our cream

compared with that of the United States,

and it was found that Canada produces

more cream than the United States per

acre, but that the United States produces

more cream than Canada. Mr. Blending

then asked how our butterfat compared

with that of the United States, and it was

found that Canada produces more butterfat

than the United States per acre, but that

the United States produces more butterfat

than Canada. Mr. Blending then asked

how our milkfat compared with that of the

United States, and it was found that

Canada produces more milkfat than the

United States per acre, but that the United

States produces more milkfat than Canada.

Mr. Blending then asked how our butter

fat compared with that of the United States,

and it was found that Canada produces

more butterfat than the United States per

acre, but that the United States produces

more butterfat than Canada. Mr. Blending

then asked how our milkfat compared

with that of the United States, and it was

found that Canada produces more milkfat

than the United States per acre, but that

the United States produces more milkfat

than Canada. Mr. Blending then asked

how our butterfat compared with that of the

United States, and it was found that

Canada produces more butterfat than the

United States per acre, but that the United

States produces more butterfat than Canada.

Mr. Blending then asked how our milk

fat compared with that of the United States,

and it was found that Canada produces

more milkfat than the United States per

acre, but that the United States produces

more milkfat than Canada. Mr. Blending

then asked how our butterfat compared

with that of the United States, and it was

found that Canada produces more butterfat

than the United States per acre, but that

the United States produces more butterfat

than Canada. Mr. Blending then asked

how our milkfat compared with that of the

United States, and it was found that

Canada produces more milkfat than the

United States per acre, but that the United

States produces more milkfat than Canada.

Mr. Blending then asked how our butter

fat compared with that of the United States,

and it was found that Canada produces

more butterfat than the United States per

acre, but that the United States produces

more butterfat than Canada. Mr. Blending

then asked how our milkfat compared

with that of the United States, and it was

found that Canada produces more milkfat

than the United States per acre, but that

the United States produces more milkfat

than Canada. Mr. Blending then asked

how our butterfat compared with that of the

United States, and it was found that

Canada produces more butterfat than the

United States per acre, but that the United

States produces more butterfat than Canada.

Mr. Blending then asked how our milk

fat compared with that of the United States,

and it was found that Canada produces

than the United States per acre, but that

the United States produces more milkfat

than Canada. Mr. Blending then asked

how our butterfat compared with that of the

United States, and it was found that

Canada produces more butterfat than the

United States per acre, but that the United

States produces more butterfat than Canada.

Mr. Blending then asked how our milk

fat compared with that of the United States,

their increased exportation of live stock, and the fact that the N.P. has been

Gave Themselves Up.

The Four Assassins of Young Montfort.

(Montreal Star, Aug. 27.)

About 11 o'clock the morning four young

men entered the office of the Police Court

and stated to one of the clerks that they

had come to give themselves up to justice

as the murderers of Montfort. They had

only heard yesterday that the young farmer

had died, and as soon as they could

communicate with each other they had

resolved to surrender themselves. Their names

are: Napoleon Gauthier, Pierre Gauthier,

Jean Baptiste Proulx, and Antoine

Proulx, and their ages range from

nineteen to twenty years. According to the

story they had been picking berries on

the banks of the aqueduct road, and were

coming along the old aqueduct road, which

enters the Lower Lachine road through

the Montfort's farm. On the way they

saw the body of the young farmer lying

on the ground, and they were

amazed to find that he was dead. They

then went to the house of the farmer's

father, and found that he was dead. They

then went to the house of the farmer's

mother, and found that she was dead. They

then went to the house of the farmer's

sister, and found that she was dead. They

then went to the house of the farmer's

brother, and found that he was dead. They

then went to the house of the farmer's

father-in-law, and found that he was dead.

They then went to the house of the

farmer's mother-in-law, and found that

she was dead. They then went to the

house of the farmer's sister-in-law, and

found that she was dead. They then

went to the house of the farmer's

brother-in-law, and found that he was

dead. They then went to the house of

the farmer's father-in-law, and found

that he was dead. They then went to

the house of the farmer's mother-in-law,

and found that she was dead. They

then went to the house of the farmer's

sister-in-law, and found that she was

dead. They then went to the house of

the farmer's brother-in-law, and found

that he was dead. They then went to

the house of the farmer's father-in-law,

and found that he was dead. They

then went to the house of the farmer's

mother-in-law, and found that she was

dead. They then went to the house of

the farmer's sister-in-law, and found</
